Bachelor's Degree in Physical

Education – VRU (2018–2022)

MBA in Financial

Management – Khaje Nasir

University (Started 2025)

PROFILE

Independent Stock Investor and Forex Trader since 2018, specializing in long-term equity investment through financial statement analysis and algorithmic forex trading using Expert Advisors and AI-driven strategies. Skilled in both technical and fundamental analysis, with hands-on experience in Python and MQL5 for building automated trading systems. Committed to data-driven decision-making, resilient strategy development, and continuous learning across global financial markets.

EXPERIENCE

Independent Investor & Forex Trader

2019 – Present

Actively engaged in financial markets with a focus on long-term stock investment and algorithmic forex trading. Specialized in analyzing financial statements for equity selection and holding assets for over two years to maximize value. Spent over 80% of time studying forex charts, testing a wide range of trading strategies, Expert Advisors, and AI-based systems. Despite the intensity of forex trading, the majority of income was consistently generated from stock investments. Developed deep expertise in market psychology, risk management, and strategy refinement through hands-on experience.

Education: Physical Education (Bachelor's Degree)

2018 – 2022

Completed undergraduate studies in Physical Education (2018–2022), pursuing a lifelong passion for sports and movement. Always driven by a deep love for athleticism, discipline, and personal growth.

MBA (financial) – Khaje Nasir University

Started 2025

Currently pursuing advanced education in financial management to deepen understanding of investment theory, portfolio strategy, and economic analysis.
